

*Ideas for successful solutions*

The image features two hands, one on the left and one on the right, reaching towards each other against a bright blue sky filled with soft, white clouds. The hands are positioned as if they are about to shake or hold each other. The lighting is bright, highlighting the texture of the skin and the details of the fingers.

We offer customised software solutions  
in order to accelerate your business processes  
and reduce your costs.

## Enterprise

Benefit from long-standing experience and expertise of a successful consulting firm that specialises in strategic, qualitative and technical challenges in the area of software systems.

We provide consultancy across various industries for strategy development and alignment of IT infrastructures and software systems, for management and controlling throughout the software life cycle as well as for the development and implementation of customised software solutions.

# Philosophy

We develop viable software solutions from visions and requirements.

With regard to software solutions, we focus on profitability, sustainability and flexibility.

We utilise modern approaches and procedures to increase quality standards.

For years, we have been able to prove that our staff has developed multiple customised software solutions in time, within budget, in the desired quality and within target.

We show you  
how to turn your visions  
into successful  
software solutions.

We bring together  
personnel with commitment  
and expertise for your projects.

## Your project team

During the strenuous everyday project work, the common tools like sophisticated procedural models, prefabricated concepts, or colourful presentations are often of only secondary importance. The decisive criterion for success or failure of a project is the expertise of the people involved in the project, as well as the quality of the work results.

Our staff has proved in various projects that even in view of the highly complex requirements of the modern economy, anyone is able to contribute in a reliable way. Accordingly, our staff is chosen, trained and consistently educated without making any compromises.

It is not easy to attract or develop and to retain such a staff. Job content, team spirit, atmosphere, colleagues and clients are the decisive surplus for all staff members and basis for a low rate of staff turnover as well as long-term protection of a substantial wealth of experience. This combination has repeatedly been referenced as unique.

Many clients from various industries trust in our work.

## References

The best references are successful projects for satisfied clients. We are proud that, for years, many of our clients have repeatedly commissioned us with the implementation of new tasks. In the following, please find an extract from our list of clients, sorted by focus area.

### Consultancy

Deutsche Rentenversicherung Bund  
PHYWE Systeme GmbH und Co. KG  
T-Systems International GmbH  
Volkswagen AG

### Management and controlling

Bundesforschungsinstitut für Kulturpflanzen (JKI)  
NRW.BANK  
Physikalisch-Technische Bundesanstalt (PTB)  
Dr. Schiller & Partner GmbH (DBD)

### Implementation

Bundesamt für Kartographie und Geodäsie (BKG)  
DIN Deutsches Institut für Normung e.V.  
Niedersächsisches Landeskrankenhaus Königslutter  
Salzgitter AG

A hand with the index finger pointing upwards, set against a blue background with a pattern of glowing, semi-transparent squares of various sizes. The lighting is soft, highlighting the texture of the skin.

Consultancy and services  
at the highest level  
for maximum client satisfaction.

## Services

We offer a broad range of services with various focal points in IT technology. But one thing always remains the same: Our services are customised for your specific challenges.

- Consulting services oriented toward your benefit
- Management and controlling services geared toward your targets
- Implementation services highly qualified personnel for your projects
- Data centre services highly available servers for your applications

Every one of our clients enjoys a guarantee for the complete life cycle of the software systems developed and implemented by us. Our performance and our quality have already convinced numerous clients.

A close-up photograph of a human hand, palm facing up, holding a large, three-dimensional blue plus sign. The hand is positioned on the left side of the frame against a light blue background. The plus sign is centered in the palm and has a slight shadow, giving it a 3D appearance.

The plus in consultancy.  
More safety  
for your software projects.

## Consultancy

New technologies and their varied fields of application deliver the decisive contribution to your competitive edge. The developments in today's IT world are proceeding rapidly. Consequently, it is not uncommon that one loses track of relevant innovations.

We are the partner to accompany you through the jungle of the IT world and to support you. On the basis of innovative ideas and starting from your visions and requests we develop solid requirements for the implementation of your IT projects and accompany these throughout their complete life cycle.

- Performance analyses
- System analyses
- Target/actual status analyses
- Rapid prototyping
- Requirement analyses
- Risk analyses
- Feasibility analyses
- Project specifications
- Software architecture
- Infrastructure consultancy
- Technology consultancy
- Quality consultancy
- Procedure and process models

Our concepts and analyses have been able to prove in a variety of successful projects that a clear definition of the objective is by far the most important component in everyday project work.

Future-oriented and target-oriented management and controlling for your success.

## Management and controlling

In various areas of an IT project, management and controlling are critical for success or failure of that project. For that reason, our experienced managers and controllers manage your project in a secure and target-oriented way.

Even in times of tight budgets and systems growing more and more complex, IT projects are implemented by our highly qualified staff · in time · within budget · in desired the quality · within target.

- Project management
- Quality management and quality assurance
- Requirement management
- Change management
- Configuration management
- Risk management
- Crisis management
- Test management

A hand is shown in the lower-left corner, holding a white puzzle piece. The background is a vibrant blue sky with soft white clouds, transitioning to a bright green field at the bottom. Several other white puzzle pieces are scattered in the air, some appearing to float or fall, creating a sense of motion and assembly.

## Implementation

For internal and on-site projects, we provide our clients with highly-qualified personnel with various specialisations to guarantee the success of the project.

Moreover, all staff members follow the principles of profitability, sustainability and expandability in their respective areas of expertise.

- Architects for a software base with experience  
e.g. UML, MDA, Enterprise Architect, objectIF
- Interface designers for intuitive desktop interfaces  
e.g. WinForms, WPF, SWING, Java FX
- Web developers for intuitive web interfaces  
e.g. ASP.NET, SharePoint, Silverlight, Flash, JSP, PHP
- High level language developers for application logistics  
e.g. C#, Java, C/C++, Delphi
- Data base developers for data management and data evaluation (business intelligence)  
e.g. SQL-Server , Oracle
- Report developers, e.g. Crystal Reports
- Testers, e.g. TDD, UnitTests

From many individual components we realise high-performance software solutions.

## Data centre

Also in the area of our data centre, we represent customised solutions. About five years ago, we already laid the first cornerstones of cloud computing, which has been much vaunted by the IT trade press. Already today, many of our clients have their own private cloud which is aligned to their company and is serviced by our qualified staff at the data centre 24/7. Thanks to the excellent accessibility of the data centre, we can guarantee our clients an availability of 99.99%.

- Hosting of applications, software as a service (SaaS)
- Collaboration and document management solutions  
e.g. Microsoft Sharepoint Portal Server
  - e-mail solutions  
e.g. Microsoft Exchange and Outlook Anywhere
  - Sales solutions, e.g. Microsoft Dynamics CRM
  - Developer solutions, e.g. Subversion, BuildServer

- Housing of servers
- Real servers
  - Virtual servers
  - Managed servers

- Cloud computing
- Private cloud
  - Infrastructure cloud
  - Software cloud

Work even more efficient  
in the cloud now  
thanks to secure  
cloud computing.
